

TRIVENDRA NAGAR

trivendranagar2005@gmail.com | +91 8821811857 | Bhopal, MP | [GitHub](#) | [LinkedIn](#) | [LeetCode](#)

SUMMARY

Third-year Electronics and Communication Engineering student with strong foundations in C++, Data Structures, and Algorithms. Hands-on experience building software and web development projects using C++, OOP, file handling, HTML, CSS, and Bootstrap. Regularly practicing problem-solving and DSA to strengthen coding and analytical skills. Seeking software development opportunities to apply technical skills, build practical solutions, and gain industry experience.

TECHNICAL SKILLS

Programming Languages	C, C++ (Proficient)
Data Structures & Algorithms	Arrays, Strings, Linked Lists, Stack, Queue, Recursion, Trees, Sorting Algorithms
Object-Oriented Programming	Classes, Objects, Inheritance, Encapsulation, Abstraction
Web Technologies	HTML, CSS, JavaScript, Bootstrap
Developer Tools	VS Code, Git, GitHub
Embedded Systems	Arduino, Sensors, IoT Fundamentals

EDUCATION

B.Tech – Electronics & Communication Engineering	CGPA: 6.71
Oriental Institute of Science & Technology, Bhopal Expected: 2028	
Class XII – MP Board	85.6%
Class X – MP Board	84.7%

PROJECTS

Spotify Web Player Clone (HTML, CSS, Bootstrap, JavaScript) [GitHub](#) → [GitHub](#) →

- ▶ Built a responsive web-based music player interface inspired by Spotify, featuring structured navigation, playlists, and music control components.
- ▶ Implemented responsive layouts and interactive UI elements using HTML, CSS, Bootstrap, and JavaScript for improved usability across different screen sizes.

Employee Management System (C++, File Handling) [GitHub](#) →

- ▶ Developed a CLI-based CRUD application to add, view, search, update, and delete employee records with persistent file storage.
- ▶ Implemented input validation and file operations using fstream, ifstream, and ofstream for reliable data handling.

Library Management System (C++, OOP) [GitHub](#) →

- ▶ Developed an object-oriented library management system using classes, encapsulation, and abstraction to manage books and user records.
- ▶ Implemented book search, issue, and return functionality with availability tracking and input validation.

E-Wallet System (C++, Logic Building) [GitHub](#) →

- ▶ Developed a menu-driven e-wallet simulation supporting deposit, withdrawal, and fund transfer operations.
- ▶ Implemented balance validation, transaction checks, and boundary conditions using conditional logic and control flow.

HIGHLIGHTS

- ▶ Built and published **4 projects on GitHub**, including 3 C++ applications and a responsive web project.
- ▶ Actively practicing **Data Structures and Algorithms**, with focus on arrays, strings, recursion, and problem-solving.
- ▶ Scored **85.6% in Class XII** and continuously expanding skills in web development and embedded systems.
