SUMMARY

Third-year Electronics and Communication Engineering student with foundations in C++, Data Structures and Algorithms, and web development. Built software and web projects using C++, OOP, file handling, HTML, CSS, JavaScript, and Bootstrap. Currently expanding into backend development with Node.js and Express.js. Seeking software development opportunities to apply technical skills and build practical solutions.

TECHNICAL SKILLS

- **Programming Languages**
C, C++
- **Data Structures & Algorithms**
Arrays, Strings, Linked Lists, Stack, Queue, Recursion, Trees, Sorting Algorithms
- **Object-Oriented Programming**
Classes, Objects, Inheritance, Encapsulation, Abstraction
- **Web Technologies**
HTML, CSS, JavaScript, Bootstrap, Tailwind CSS
- **Developer Tools**
VS Code, Git, GitHub
- **Embedded Systems**
Arduino, Sensors, IoT Fundamentals
- **Currently Learning**
Node.js, Express.js, REST APIs, Backend Development, Database Fundamentals

EDUCATION

B.Tech – Electronics & Communication Engineering	CGPA: 6.71
Oriental Institute of Science & Technology, Bhopal Expected: 2028	
Class XII – MP Board	85.6%
Class X – MP Board	84.7%

PROJECTS

Developer Portfolio Website (HTML, CSS, JavaScript) [GitHub ↗](#) | [Live Demo ↗](#)

- Designed and developed a responsive personal portfolio website to showcase technical skills, projects, certifications, education, and achievements.
- Implemented interactive navigation, scroll-based animations, responsive layouts, custom UI interactions, and a contact form using HTML, CSS, and JavaScript.
- Deployed the portfolio on Vercel and managed the source code using Git and GitHub.

Spotify Web Player Clone (HTML, CSS, Bootstrap, JavaScript) [GitHub ↗](#) | [Live Demo ↗](#)

- Built a responsive web-based music player interface inspired by Spotify, featuring structured navigation, playlists, and music control components.
- Implemented responsive layouts and interactive UI elements using HTML, CSS, Bootstrap, and JavaScript for usability across different screen sizes.

Employee Management System (C++, File Handling) [GitHub ↗](#)

- Developed a CLI-based CRUD application to add, view, search, update, and delete employee records with persistent file storage.
- Implemented input validation and file operations using fstream, ifstream, and ofstream for reliable data handling.

Library Management System (C++, OOP) [GitHub ↗](#)

- Developed an object-oriented library management system using classes, encapsulation, and abstraction to manage books and user records.
- Implemented book search, issue, and return functionality with availability tracking and input validation.

HIGHLIGHTS

- Built and deployed a personal developer portfolio using HTML, CSS, JavaScript, and Vercel.
- Strengthening Data Structures and Algorithms through regular problem-solving practice and core algorithmic concepts.
- Scored 85.6% in Class XII and continuously expanding skills in web development and backend technologies.
